

WaterPoint LNC

Leak Noise Correlator

WaterPoint Leak Noise Correlator (LNC) is integrated into the WPN2 Asset Management System App. Leaks are pinpointed on the map, using asset information in WPN2 and advanced signal processing.

- Programmable for immediate or overnight recording
- Works on iPad, iPhone or iPod touch (iOS 11 or later)
- 2 to 4 sensors per system
- Superior high resolution ambient noise cancellation
- Selectable filter settings
- Automatically saves correlations
- GIS data import available
- Automatic pipe distance calculation
- Lightweight & portable

WaterPoint LNC

Deployment

LNC Sensors are placed physically on the pipe network, usually at hydrants or valves, and optionally on the iPad map. LNC Sensors communicate wirelessly with the iPad.

Pinpointing

Leaks are pinpointed using the map information and advanced signal processing. Leak location(s) are presented as distances from sensors and also shown by color-coding pipes on the map.

WPN Cloud Server

LNC data is reviewed on the iPad, saved and shared with other users via the WPN Cloud Server. 64seconds is your virtual consultant.

In the Box:

- 2-4 LNC Sensors
- LNC Base, manages communication
- LNC Dock, stores & recharges sensors
- LNC Stage, for direct asphalt recording
- Protective and eyebolt sensor caps
- Recharging devices for office & auto
